OBJECTIVE

I am a software engineer with a strong understanding of programming concepts and a passion for building innovative solutions. I have extensive hands-on experience through several projects, and I am skilled in a variety of programming languages and technologies. I am also a highly motivated and quick learner. I am committed to lifelong learning and staying up-to-date on the latest industry trends.

TECHNICAL SKILLS

- Programming Languages :- JavaScript, Python, CSS3, HTML5
 - Frameworks & Libraries :- React JS, Bootstrap, Node JS
 - Databases :- MySQL
 - Problem Solving :- Analytical, Creative, Troubleshooting
-

EXPERIENCE

Epsilon Infinity Services Pvt. Ltd.

Intern - Software Engineer[July'23 - Present]

Project : Epsilon Dairy

Description : It is a school management assistant, which is used by students, parents, teachers, and admins to track attendance, assignments, grades, and more.

- Developed a user interface using React that allows users to manage their tasks.
 - Employed a component-based approach that is easy to maintain and update.
 - Used Git to collaborate on project, regularly reviewing and testing the source code to ensure the quality of the application.
-

ACADEMIC PROJECTS

Battleship Game with (Python, Tkinter GUI library)

Description: Built a game with customized UI where a player will play against a computer. The user has to place the ships within the grid and has to guess the computer ships.

Random Joke Generator with (JavaScript, HTML & CSS)

Description: This project demonstrates the use of the Fetch API in JavaScript to make HTTP requests which collects the random jokes from the API link and displays the results on a webpage.

EDUCATION
